Brief Industrial Profile of Churu District

1. General Characteristics of the District

It is believed that the town was founded by the Jat ruler *Churu* in 1620 A.D and the place was named as Churu after his name in the Jangladesh region of the state. Before it came under the control of Rajputs rulers of Rathore clan. Thakur Maldeo, the grandson of Rao Kandhal or Rawat Kandhal and uncle of Rao Bika, the Rathore Rajputs of Bikaner ruled over the region.

During war of 1871 between Bikaner and Churu, the area came under the dominance of Bikaner. It is said that during the war between both the regions all the weapons made by copper and brass got finished, the Churu Thakur requested all the women population of his town to donate their silver ornaments so that the shells made by silver can be utilized for cannons.

Before independence it was an integral part of Bikaner princely state. In 1948 the district came into existence as a separate state comprising three Tehsils Churu, Taragarh and Rajgarh.

Connectivity:

Air: The nearest Airport is in Jaipur (206 Km)

Rail: Churu district is served by broad gauge of Northern and Western railways. The total length of rail line is 280 k.m. The district has 39 Railways stations.

Road: Churu district is well connected by roads with important destinations of the state. The National Highway No.11 (Agra-Bikaner) passes through the district.

1.1 Location & Geographical Area.

Recognized as an entry gate to the great Thar Desert, Churu is located in the desert area of Rajasthan. The district is located in the eastern Rajasthan between 27°24 to 29°00 North latitude and 73 °.40 to 75 °.41 East longitudes. It is bounded by Sri Ganganagar district in the

North, by Sikar and Jhunjhunu and Hissar district of Haryana in the East, by Nagaur in the South and in the West by Bikaner. Churu, like an oasis, situated in the middle of the shifting golden sand dunes, opens the gate to the great desert of Thar. The north border is neighbour of Hanumangarh District, east by Haryana state, Jhunjhunu and Sikar districts to the southeast, Nagaur District to the south, and Bikaner District to the west. The total area of the district is 13, 85,898 hectares. It is occupied nearly 4.92 percent of the area of the state and stands eight in respect of area amongst the district of Rajasthan. The district covers 6 Tehsils Churu, Ratangarh, Taranagar, Rajgarh, Sardarshahar, and Sujangarh. The major attractions of Churu district are its Havellies.

1.2 Topography

District Churu is a part of the great Thar Desert. It is covered with a thick mantle of sand, is characterized by 6 to 30 meter longitudinal dunes trending north east to south west. The ground level in the district is about 400 meters above mean sea level the terrain in general is sloping from south to north. There are no big hill in the district except some hillocks. There are no perennial rivers or streams in the district. Wells and ponds are the principal sources of water supply.

The climate of the district is dry desert with large variation in temperature. The minimum and maximum temperature recorded in the district varies from -2°c to 50°c . Relative humidity is generally below 30% except during the brief south east monsoon period when the same rises up to 60% in the district the rainy season usually lasts from July to mid-September and the normal usual rainfall is only 328 mm.

1.3 Availability of Minerals

GEOLOGY AND MINERALS:

Churu is not rich in minerals but these are found at few places. The various mineral deposits are Masonry Stone, Marble & sand stone, etc. But these deposits are very small in size and not of much economic importance.

MAJOR & MINOR MINERALS:

Churu District is poorest in mineral resources. However, lime stone & marble and masonry stone are important mineral products of the district.

MINERAL BASED INDUSTRIES:

During 2018-19 the production of minerals is given in the following table.

(Production in M.T.)

S.No.	Minerals	Mines Location	No. of Mining Lease	Production in M.T.
1	Brick Earth	Rajgarh, Sardarshahar	12	262816

3.7.2-Potential for new MSMEs

Churu district is backward area in perspective of industries and is declared no industry district by Central govt. and various facilities are given to these units by the Govt. due to lack of infrastructure facilities, Metallic entity, forests. Real entrepreneurs and incessant famine are the prominent reasons for industrial backwardness of the district.

Millet, Kidney-bean, Moth, gram, mustard, Tara Mira and Ground Nuts are cropped abundantly in this area. The agriculture is based on the monsoon out rightly, In some tehsils, irrigation is made by extracting water from wells but it is not successful due to salty and deep water. Hence, the future of agriculture-based units is dependent on Monsoon.

Only masonry and marble stones are available as a metallic in the district. Masonry stones are available in Randhisar Hill, Lodasar, Biramsar and Gopalpura where stone grit units are establishing. Marble stones are extracted in village Dunkar, tehsil Sujangarh that are colored linear but not superior to other marbles. There is potentiality of setting up some more units manufacturing Marble Tiles in the area.

There are 1860995 animals in the district as per the census of 2012. A live stock based unit. i.e. Shoes making, leather and woolen dyeing may be set up in the district.

The infrastructure facilities are available in Industrial area developed by RIICO in all tehil i.e. Churu Sujangarh, Saradashahar, Rajgarh, Ratangarh, Taranagar and Bidasar..
